## Investments in WWTP

Project Workshop in Riga, Latvia  
April 2-4, 2019

Latvijas Piens LTD  
Imants Bozovics

# Dairy Latvijas Piens

# OUR HISTORY

**1896**

One of the oldest dairy plants in Latvia- the Trikata dairy- begins work at the White House of the Trikata Manor House. Back then all the work was done by hand.

**1972**

Trikata dairy has a new Cheesemaster- Mr. V. Culcs, who creates the first Tilsiter cheese recipe in Latvia. All the other types of cheese are improved to the utmost perfection bringing quality certificates and awards to the dairy.

**2013**

The cheese making skills acquired for over more than a century are combined with the latest Swiss cheese production technologies — from now on the Trikata cheese is made at the new "Latvijas Piens" dairy plant.

**2017-2019**

Since 2017, the main shareholder of «Latvijas Piens» is Eximo Agro-Marketing – a subsidiary company of the German concern «Fude+Serrahn Milchprodukte». 90% of cheese produced at "Latvijas Piens" dairy plant has been exported.

# Dairy Latvijas Piens

- Short company ownership info:
  - Established in 2012;
